

First Grade Inclement Weather Plans:

Day 1: Read a book and write a story to retell what you read. Make sure you use transitional words in your story (first, next, and last), and use complete sentences.

Study your math facts. Make a fact family using 4, 8, and 12.

Day 2 : Read a fiction book and write the story elements (characters, setting, problem, and solution). Use complete sentences and draw a picture to match.

Practice your math facts. Create a story problem using 2 of your facts. Example: Sam had eleven strawberries. He ate 6 of them. How many strawberries did he have left?

Day 3: Read a book. Tell your parents the main idea of the story (what the story is mostly about). Was your book fiction or nonfiction?

Write as many facts as you can that equal 10 (ex: $6 + 4$). Write a story about what you did today. Your story should include a topic sentence, 3 details, and a conclusion.
